

HPE Aruba Networking access point trade-up program

Investing in quality networking hardware is essential to keep your business connected, secure, and running smoothly. Enhance network performance, reliability, and efficiency by upgrading your hardware.

Next generation Wi-Fi 6E access points (APs) from HPE Aruba Networking provide more capacity and wider channels, greater efficiency, higher throughput, and maximum levels of security.

1,2,3—new AP! Trade-up made easy.

Refresh and recycle your legacy HPE Aruba Networking wireless hardware and receive credit towards the purchase of new HPE Aruba Networking APs.

We are pleased to offer customers an attractive trade-up credit for their existing legacy HPE Aruba Networking AP-1xx, AP-2xx, AP-3xx Series APs when they purchase select new HPE Aruba Networking AP-6xx Series Wi-Fi 6E hardware.

Customers can receive up to a \$125 credit per eligible AP with a minimum 50 trade-up APs per order.

Smarter sustainable IT

Customers will have the option to either self-decommission their legacy access points or leverage our [HPE Asset Upcycling service](#) to recycle their hardware in a secure, globally consistent, and environmentally responsible manner.

Programs like this are a great example of how working towards sustainable IT goals can help customers save money and see better results. HPE views sustainability as a value add for customers—and one that is rapidly becoming a powerful differentiator for market access.
